

Anti-caking agent

S - 903

Features and advantages:

S-903 anti-caking additives are used in various powder coatings to prevent caking, improve porosity, speed up powder production, improve efficiency, and do not affect the surface effect and luster of the coating.

- 1. Prevent clumping
- 2. Improve the porosity
- 3. Increase the fluidization and atomization effect of powder spraying
- 4. Excellent compatibility with resin

Technical parameter:

appearance	White powder
Particle size	5µm (D50)
Fusing point	120℃
density	0.98 (g/cc)

Addition amount and use method:

- 1. In different systems, the addition amount of S-903 anti-caking additives is generally 0.3-2%
- 2. Fluffy powder, extruded inside to add

Packing: Net weight: 10kg/bag (lined with polyethylene bag)

Storage: It should be stored in a clean, ventilated and dry warehouse to avoid impurities
