Wetting Dispersant

RD-9716

Features and Advantages:

RD-9716 is a kind of high polymer dispersant, mainly for inorganic pigments (extinction powder, talc, barium sulfate, etc.) grinding dispersion, has excellent wetting dispersion and anti-sedimentation effect on pigments, and has good compatibility with other resin pigment system, especially for UV wood paint extinction powder dispersion and anti-sedimentation.

Product parameter:

Appearance	Pale yellow viscous liquid
Constituent	High polymer block polymer with pigment loving group
Active ingredient	100%

Scope of application:

1. Grinding and dispersing of inorganic pigments (especially extinction powder, fillers, etc.) in coating and paint systems;

2. Dispersion stability of inorganic fillers.

Recommended dosage:

Inorganic pigments :1.0-5.0％

Filler such as talcum powder :0.5－2.0％

Usage:

RD-9716 was dissolved in the mixture of grinding base material, and then pigment was added for grinding.

Packing:

25KG or 200KG / drum.

Storage:

Keep away from sources of fire and light; store in a dark place.
