Dispersant

RD-9773

Features and Advantages:

RD-9773 is a kind of polymer polymer dispersing agent, widely used in weak polar solvent ink system and PVC color paste/paste, inorganic pigments and fillers have good dispersion, can improve the pigment dispersion, improve the coloring strength and gloss, and improve the fluidity, improve the storage stability of color paste.

Product parameter:

Appearance	Yellow sticky paste
Active ingredient	98±2%
Color (Gardner)	≤13
Density	0.90g/cm
Flash point	188℃

Recommended dosage:

Inorganic pigments :0.5-5%

Usage:

RD-9773 was dissolved in the mixture of grinding base material, and then pigment was added for grinding.

Scope of application:

1, Especially for aliphatic and benzene solvents with low polarity;

2, The use of adhesive ink to improve the fluidity of excellent performance.

Packing:

25KG or 200KG/drum.

Storage:

Keep away from sources of fire and light; store in a dark place.
