## Broad-spectrum defoamer

### RP-6417

#### Features and advantages:

RP-6417 is a mineral oil based, containing hydrophobic silica, polyether defoamer, has excellent defoaming effect, and has few shrinkage holes, and is widely used.

Strong general performance and excellent continuous defoaming effect. Especially suitable for medium viscosity, PVC in the range of 20%-50% water-based latex system film will not appear oil shrinkage, the amount of 0.35% when the overall can opening effect is the best.

#### Product specification:

appearance	Translucent colorless - light
Active ingredient	100%
Specific gravity	0.85 g/ml
Ionic type	nonionic
Water solubility	Disperse in water

**Applications:** Waterborne coatings, various emulsions, waterborne binders.

**Usage and dosage:** It can be added to the paint in the form of the original, adding amount of 0.1%-0.4%. When using the product for the first time, add the lowest amount until the best results. Stir well or shake well before use. (Layering during storage does not affect efficiency)
