

Feel smooth additive

RT-3068

Features and advantages:

RT-3068 is a polymer weight silicone dispersion, excellent wear resistance, smooth dry feel, mainly used for waterborne leather and synthetic leather table treatment.

Product specification:

appearance	Translucent viscous liquid
Specific gravity 25°C	0.98
Non-volatile ingredients	80%
Closed cup flash point	94°C

Main application:

- RT-3068 as a waterborne leather and synthetic leather surface treatment agent, used in high viscosity ink and epoxy floor paint, water based finish oil additive.
- As an airbag lubrication coating, tire interior coating agent, many tire manufacturers have developed proprietary airbag lubrication formulations that can replace multi-purpose lubricants (BPL). The airbag lubrication system shows that material and labor costs can be reduced by omitting the spraying operation.

Usage method:

Before adding RT-3068, dilute the solvent system 5 ~ 10 times before adding, and stir well, and dilute the water-based system with water before

adding.

Packing: 1kg, 20kg plastic drum.

Storage: Stored unopened below 38 ° C, the shelf life is 18 months from the date of production.
