

Dispersant

RD-9315

Features and advantages:

RD-9315 is a kind of polymer dispersant, widely used in solvent coating system. It has excellent grinding and dispersing effect on carbon black and organic pigment. Good versatility. It is widely used in oil-based ink paste production.

Product specifications:

appearance	Yellowish brown liquid
Effective component	50±2%
The proportion of	0.98g/cm ³
Chroma (Gardner)	≤9
The boiling point	about 105°C
solvent	n-PAC

Application areas:

1. Disperse and grind carbon black and organic pigments in automotive paint, industrial paint, plastic paint and other systems.
- 2, in a variety of oily ink coating general color paste system dispersion grinding and organic pigments.

Recommended dosage:

Organic pigments: 7-15%

Low surface carbon black: 10-20%

High surface carbon black: 40-80%

Usage: dissolve RD-9315 in the mixture of grinding base material first, then add pigment for grinding.

Packing: 25KG/ drum, 200KG/ drum.

Storage: keep away from high temperature and fire source, place in ventilated and cool place; Please seal after use; Shelf life is 36 months.
