

Levelling agent

RF-7613

Features and advantages:

- RF-7613 is a leveling agent for solvent-based coatings. And excellent anti-fouling performance, mostly used in spraying system.
- When the substrate is contaminated by silicone oil or grease, it will cause problems (such as poor adhesion, small holes, craters, etc.), which can effectively solve the painting problem.
- With good leveling, smoothing and release characteristics, it can be used in heat resistant non-stick kitchen paint formula, heat resistant temperature up to 250°C
- Fabric processing application, with soft, water and smooth effect, increase the washable good.
- The recoating property of this product is not good, please apply to the comprehensive formulation system.

Product specification:

appearance	Transparent liquid
Solid inclusion	100%
Hydroxyl value	Modified polysiloxane

Applications: solvent-based coatings, high temperature Teflon coatings, solvent-based inks

Recommended dosage: 0.1-1% for full dosage.

Storage and precautions: Storage environment is 0-40°C, stored in a cool and ventilated place, keep the container close, away from heat and fire sources.
