

Hammer agent

RT-3030

Features and advantages:

RT-3030 is a special surface adjustment agent, which can make aluminum powder pattern uniform, exquisite, three-dimensional feeling strong. Due to its stable molecular chain structure, the pattern will not change greatly during storage.

Product specifications:

Appearance	Colorless transparent liquid
The density of	0.890
Valid copy of	100%
Flash point	> 100

Application:

solvent coating

Recommended dosage:

0.05-0.5% of total formula

Usage:

add in paint blending stage.

Packing:

25kg non-recycled blue iron drum. The product is not used completely, after use must cover tightly inside and outside.

Storage:

keep away from heat and fire and keep away from light.

Matters needing attention:

1. Do not pollute other products with RT-3030.
2. As the amount of RT-3030 increases, the pattern becomes fine from coarse.

3, different batches, different materials, different construction conditions will cause a small gap in hammer paint, this feature is the normal phenomenon of all hammer agent and hammer paint, it is best to try every batch of spray, in order to adjust the uniformity of the pattern.
