

Adhesion enhancer

RT-3164

Features and advantages:

RT-3164 is a kind of epoxy functional silane polymer, as a bonding promoter can significantly promote the film (adhesive) and a variety of inorganic substrate adhesion, is mainly used for glass, ceramic and other inorganic substrate, and the concrete with epoxy resin, polyurethane and acrylic water-based resin system such as good compatibility, can achieve more than 6 months shelf life, safe environmental protection, No organic volatiles are released during drying.

Product specifications:

appearance	Colorless to light yellow transparent liquid
Valid copy of	98±2 %
The proportion of	1.02±0.02g/cm ³
Flash point (open	68°C

Application areas:

1. Improve the adhesion of inorganic substrate in epoxy resin and other resin coatings and adhesives;
2. Adhesion of glass paint to the substrate;

3. Surface treatment of inorganic fillers (quartz powder, diatomite and barium sulfate, etc.)

4. Processing of packing such as glass fiber.

Recommended dosage: 0.2-3wt % of the total formula. It is recommended to determine the best dosage and compatibility before use.

Packing: 200kg/25kg plastic drum.
